Education

Vellore Institute of Technology

5 years Integrated M.Tech in Computer Science and Engineering

Aug 2022 – Apr 2027

Technical Skills

Programming Languages: Python, SQL, HTML/CSS, Flutter

AI/ML & Data Science: Machine Learning, NLP, NumPy, Pandas, Scikit-learn, TensorFlow, PyTorch, Flask

Databases & Cloud: MongoDB, MySQL

Tools & Platforms: Git/GitHub, Postman, Android Studio, Tableau, Power BI

PROJECTS

AI Fitness Mirror | Python, OpenCV, MediaPipe, Streamlit, WebRTC 📄 [Repo](#) [Demo](#)

May 2026 – July 2026

- Built a real-time AI fitness coach that automates form-correction feedback via webcam or uploaded video, extracting 33 body landmarks per frame with MediaPipe and computing joint angles (knee, hip, elbow) using NumPy.
- Designed a rule-based biomechanical scoring engine and angle-curve state machine to detect form errors (e.g. squat depth, back alignment) and count reps in real time, with auto-exercise detection from torso orientation and joint motion.
- Deployed a dual-mode pipeline (video upload with annotated timeline output, and live WebRTC streaming with no frame storage) on Streamlit Cloud, resolving production issues (libGL/glib dependencies, Python version conflicts) to stabilize MediaPipe in a cloud Linux environment.

Real-Time Fraud Detection with Streaming ML | Python, Kafka, PySpark, XGBoost, MLflow 📄 [Repo](#) [Demo](#) Jan 2026 – Mar 2026

- Built an end-to-end streaming ML pipeline that automates fraud detection across 284K+ financial transactions via Apache Kafka, running real-time XGBoost inference inside PySpark Structured Streaming with 86.73% recall and 0.976 ROC-AUC.
- Engineered SMOTE-based class balancing on a 0.17% fraud-rate dataset and tracked all experiments via MLflow Model Registry, enabling reproducible model versioning and promotion across staging and production.
- Persisted real-time predictions to Delta Lake with ACID guarantees and deployed a FastAPI inference endpoint with risk-level scoring, containerized via Docker with Kafka + Zookeeper orchestration.

WORK EXPERIENCE

Software Development Intern

Madhya Pradesh Poorva Kshetra Vidyut Vitaran Company Limited (MPPKVVCL)

Oct 2025 – Dec 2025

Jabalpur, Madhya Pradesh

- Developed a Flutter-based mobile app for Android and iOS, delivering real-time electricity consumption insights to 10 Lakh+ consumers across the distribution network.
- Secured backend integration via RESTful APIs with token-based authentication and IVRS-based consumer identification to reliably fetch and process live metering data.
- Implemented TOD (Time-of-Day) differential logic to disaggregate raw energy register readings into structured T1–T4 tariff-wise breakdowns for actionable billing insights.

CERTIFICATIONS

- Microsoft Azure Fundamentals (AZ-900): Microsoft [Certificate](#)
- IBM AI Engineering: Coursera [Certificate](#)

EXTRACURRICULARS

- Genesis X Hackathon (First Place): Achieved first place among 15 teams by successfully progressing through three rounds of competition and performing comprehensive data analysis to deliver an end-to-end technical solution in the final stage.
- StockQuest (Winner): Secured first place among 50 teams by advancing through five rounds of stock market and trading quizzes and excelling in a real-time market simulation.
- Competitive Programming: Solved 550+ DSA Problems across LeetCode, GeeksforGeeks, and Codeforces.
